Hisense Profile

Hisense was founded in 1969. At present, Hisense owns two listed companies- Hisense Visual Technology Co. Ltd. (600060) and HISENSE H.A. (SZ000921, HK00921), listed in Shanghai, Shenzhen and Hong Kong. And it also owns many brands including Hisense, Toshiba, Gorenje, Kelon and Ronshen. In 2022, the sales revenue reached 183.5 billion RMB, and the overseas income will accounts for 75.7 billion yuan, with a 10-year compound growth rate of 8.5%.

Hisense products are exported to more than 160 countries and regions, and have successively sponsored the world's top sporting events such as the UEFA EURO 2016, FIFA World Cup 2018, UEFA EURO 2020 and FIFA World Cup 2022. According to the China National Image Global Survey released by China International Publishing Group, Hisense was rated as one of the "Top Ten Most Familiar Chinese Brands to Overseas Citizens" for five consecutive years. More importantly, Hisense is one of the first innovative enterprises in China and has won the "National Quality Award" twice. Hisense Group has 31 industrial parks, located in Qingdao, Shunde, Huzhou, Czech Republic, South Africa, Mexico, etc.. There are 23 R&D centers in Qingdao, Shenzhen, the United States, Germany, etc., with 7,000 R&D personnel, more than 3,000 of whom are with master's degree and more than 100 with doctor's degree. Hisense has initially established a global collaborative R&D system.

HISENSE CLUB

Better Training and Service

Hisense HVAC Dubai Promotion & Training Center, located in Dubai, UAE, is an AAAAA Hisense training center all over the world, where showing and training products included RAC, FM, LCAC, VRF, etc. The promotion & training center conducts online and face-to-face training for customers all over Middle East Africa. The center is equipped with training room and exhibition hall, the exhibition area of the training center will display Hisense's latest HVAC products and technologies.

Daily Training

REFERENCE PROJECT LIST

Hisense International feel so glad to share our project reference 364 Nos of Townhouses located in Townsquare area, Dubai. These beautiful townhouses are developed by Nshama. Hisense AC division is supplying 1092 ducted units and 364 wall mounted units with a total capacity of 2430 tons. These ducted units are high energy efficient units with an EER range of 11.8 to 12.3.

Hisense AC has a wide range of product lines with inverters and on/off compressors. Our ducted units come with inbuilt drain pumps from the factory. Moreover, all the ducted inverter units are single phase units even big capacities, also indoor units are very silent.

HISENSE'S DEVELOPMENT IN MEA

Layout

MEA region covers a total of 70 countries with a total population of 1.478 billion, about one fifth of the world's total population. GDP per capita US\$3416.

Revenue

Hisense earns Dubai Quality Global Award

Hisense, a brand with less than 10 years of operating history in the Middle East market has been honored by the Department of Economy and Tourism (DET) in Dubai with the coveted Dubai Quality Global Awards 2022 on March 23rd. The announcement was made under the patronage of His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice-President and Prime Minister of the UAE and Ruler of Dubai. Hisense won the reward among many competitors, indicating that Hisense is recognized for its outstanding strengths. The candidates of the award are strictly selected for three to four months. The judges believe that under the impact of the pandemic, winning the "Dubai Quality Global Award" shows Hisense's unremitting efforts to re-open to the world and its positive contributions to local economic recovery and development.

SPORTS MARKETING

Hisense is the official sponsorship of the FIFA World Cup 2022™ is the latest in a long line of sporting tie-ups that demonstrate the company's competitive elevation. Sporting partnerships include sponsorship of the UEFA Euro 2016 and 2020 football tournaments, Australian Open tennis, NASCAR Xfinity Series, Red Bull Racing F1 team, Joe Gibbs Racing, and football clubs FC Schalke 04 of Germany and France's Paris Saint-Germain.

SOCIAL RESPONSIBILITY

From 2012 to 2017, Hisense
sponsored the United Nations
Environment Program Green
Award for six consecutive years.

From 2015 to 2017, Hisense
sponsored the donation of
Mandela Day Orphanage in South
Africa.

For Christmas 2015-2017, Hisense
donated lunch to Orion Disabled
Persons' organization and spent
the holidays with it.

In 2018, Hisense Uganda donated
to MADUFAFA.

In 2020, Hisense donated
anti-epidemic materials and
other supplies to the Charlotte
Maxeke Hospital JHB.

In 2020, Hisense donated
refrigerator products to Paarl
Hospital in South Africa to store
medicines.

In 2020, Hisense donated TVs to
Mamas Alliance for Kids Study
under Covid-19.

In 2020, Hisense Ghana donated
ambulances to local hospitals.

In 2021, Hisense Ghana donated
air conditioners to
Air Force training school.

In 2021, Hisense Ghana donated
TV products to hospitals.

In 2021, Hisense Dubai awarded by
Dubai Chinese School.

In 2021, During COVID restrictions,
Hisense Dubai offer A/C Service in
extreme summers.

RESIDENTIAL AC

Hisense

LIFE RESCUE

INTELLIGENCE

AI Smart

Smart eye can identify people's position. AC can intelligently adjust temperature and humidity, air flow direction and speed, and provide users with comfortable air flow enjoyment.

WIFI Control

For controlling the climate with your smartphone via Wifi. Enter APP Menu Select Air Conditioner Set mode, temperature, air flow, etc.

Voice Control

Voice control makes life easier.

Dual Self-Clean

Hisense's patented second-generation cleaning technology, high-temperature drying and purification, effectively remove dust, bacteria and oil from indoor and outdoor units, and easily regain clean air conditioners.

Anti-bacteria Fin

Silver ion coated fins effectively inhibit Staphylococcus aureus, Escherichia coli, mould, Keep the air healthy.

- Staphylococcus aureus 99.9%
- Escherichia coli 99.9%
- Anti-mildew 0 Level (The Highest)

CLEAN

Anti Mildew Running

The indoor fan will continue running for 30 seconds after turning off the AC, the evaporator and other parts of the indoor unit will be blown dry, prevent mildew growth, keep the AC clean at all times.

HEALTH

HI-NANO (optional)

Healthy high-concentration ions can effectively remove airborne dust and inhibit viruses and bacteria.

HI-NANO

Hi-nano release high-concentration dual ions

Bacteria lose their activity after being adsorbed by dual ions

Bacteria eliminate and generate water

Healthy Filter

Hisense have more than 12 single healthy filters for selection, which can achieve the effects of dust removal, deodorization, PM2.5 removal, and 3-in-1 filter and 4-in-1 filter can achieve the combined effect of multiple single filters.

RELIABILITY

Anti-corrosive Golden Fin

The golden fin used in air conditioner heat exchanger has high heat exchange efficiency, provides stable and durable cooling performance, it is high end stylish and more attractive.

Self-diagnosis Protection

Real-time monitoring and real-time self-diagnosis of faults, clearly displayed fault codes allow faster troubleshooting and easier maintenance.

High Temperature Resistance PCB

The PCB board in the inverter air conditioner can still run normally under the high temperature of 85°C.

Anti-corrosive Design

Accompany your family for many years. Using sheet-metal and coated U-shape tube for the best anti-corrosion, and anti-rusting effect, the AC can be an accountable and long-lasting friend of your family. Saves your time and your fixing bills.

INTELLIGENCE AC

Change your life

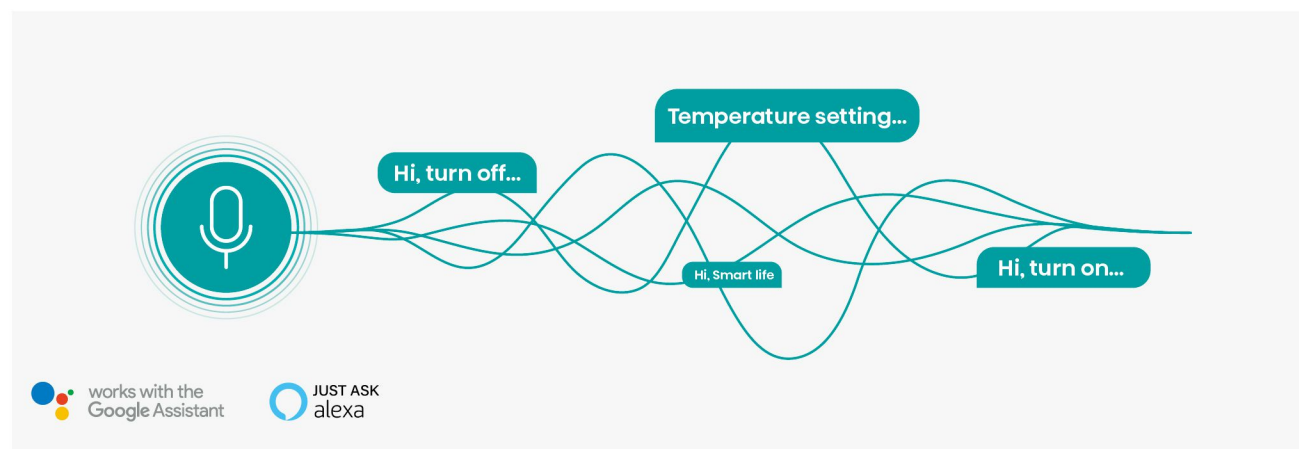

Connect Life APP

When the air conditioner is connected to Wi-Fi through the Hisense module, you can control the air conditioner freely through the ConnectLife app anytime and anywhere.

Voice Command

When the air conditioner is connected to Wi-Fi through the Hisense module, you can control the air conditioner by voice via Amazon or Google speakers, such as turning on the AC, setting mode, and adjusting the temperature, thus freeing your hands.

COMFORT

Give you a good mood

Long Distance Airflow

Through the trinity of centralized air supply, large-diameter fans, and dual-rotor DC inverter compressors, AC can reach 18m ultra-long-distance air supply, to realize the airflow sharing of hall and kitchen, so that every corner of the home is filled with coolness and comfort.

Four Sleep Modes

Providing different sleep temperature care for family members, so you can enjoy a sound sleep in a comfortable environment.

4D Auto-swing

Automatically swing in the horizontal and vertical directions to improve the heat dissipation distribution, optimize the indoor air flow in all directions, and send the air to every corner of the space, so that the comfort is more comprehensive, and the all-round surround is more comfortable.

HEALTH

Bringing fresh and clean air to you.

4-in-1 Filter

The combination of four filters can effectively remove all kinds of dust and odor in the air and refresh the indoor air.

*The promotional content needs to be modified according to the combination of different types of filters.

Intelligent Dual Cleaning

Composed of Anti Mildew Running and Self-cleaning of evaporator, to achieve a deeper clean, more healthy air supply effect.

Self-clean

Hisense patented self-clean technology of evaporator can keep your air conditioner clean and reduce bacteria, microorganisms, oil stains and so on, via a frosting and defrosting cycle, you can easily regain a clean air conditioner.

HIGH RELIABILITY

No fear of high temperature

High Temperature Resistance PCB

"The PCB board in the inverter air conditioner can still run normally under the high temperature of 85°C. High reliability, long life running".

3 Minutes Protection

The 3 minutes protection can avoid damages to the compressor and extend the compressor's life span.

Self Diagnosis & Automatic Protection

Have a real-time monitoring and self-diagnosis in the event of a malfunction by display error code. Emergency power down when close to system overload.

Anti-corrosive Golden Fin

The unique anticorrosive golden fin can withstand the salty air, rain and other corrosive elements. According to the salt spray test, the level of corrosion protection is significantly 3 to 4 times better than normal fin. It also has better hydrophilic, higher heat exchanging efficiency and more attractive than normal fin.

ENERGY SAVING

Minimize power consumption while providing cooling comfort

Twin Rotary DC Inverter Compressor

Reduce friction during operation, make rotation more stable, vibration less, and prevent the leakage of refrigerant gas during compression.

ECO Mode

One button, AC immediately enters the energy-saving mode to minimize power consumption, which can save 30% power compared to ordinary inverter AC and saves 70% power compared to ON-OFF AC.

R410A

More efficient than R410A; 30% less per-charge than R410A ; 75% reduction in global warming; 100% pure and recyclable Effective Power Saving; Ultra-low Energy Consumption; Non-toxic and environment friendly.

TECHNOLOGY

Emphasis on independent innovation, focus on comfort

HI-SMART

Advanced self-adaptive BLDC compressor driver technology makes the air conditioners run more quietly and more efficiently, and bring more comfortable experiences to the consumers.

QSD Rapid Frequency Conversion Startup Technology

Through QSD rapid inverter startup technology, compressor can reach the highest operating frequency as soon as possible, so as to quickly refrigerate.

Double mode frequency conversion can save power for short and long use. One of the efficient power-saving modes, so that the elderly and children, gentle cooling do not catch a cold. In addition, the long-acting energy-saving model enables people who are afraid of heat to enjoy cool and refresh instantly.

MULTIZONE

Smart Control By Multizone

The smart control performed by our systems allows the user to achieve an optimal level of thermal and acoustic comfort as every single zone is controlled independently. We offer numerous possible combinations so that our solutions can be adapted to the needs of the user and the installation.

Adapted Airzone Controller

INTELLIGENT CONTROL

Connect Life

When the air conditioner is connected to Wi-Fi through the Hisense module, you can control the air conditioner freely through the ConnectLife app anytime and anywhere.

Voice Command

When the air conditioner is connected to Wi-Fi through the Hisense module, you can control the air conditioner by voice via Amazon or Google speakers, such as turning on the AC, setting mode, and adjusting the temperature, thus freeing your hands.

Round Flow

Round air supply optimizes room airflow, ensuring that a comfortable airflow reaches every corner and that the temperature of the entire space is perfectly balanced.

Wide Airflow

The swing airflow can widely reach up to 88°. Thanks to wide airflow, we can get the cooling ceiling airflow and strong heating airflow.

High Efficiency Coil

The cassette adopts a G type design with a larger heat exchange area. Compared with traditional heat exchanger, it is more high-efficient and more power-saving.

Fresh Air Intake

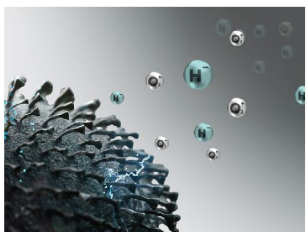

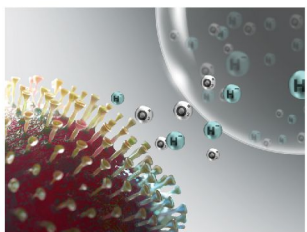

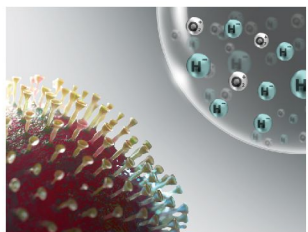

The fresh air intake can introduce the outdoor fresh air into the room to improve the indoor air quality.
* The fresh air volume cannot exceed 20% of total design air volume.

HI-NANO (Optional)

HI-NANO can effectively prevent bacteria.Release a large number ion stream , kill and remove bacteria and viruses quickly through the recycle indoor air.

■ HI-NANO reliably reaches pollutants.

■ Hydroxyl radicals denature pollutants' proteins.

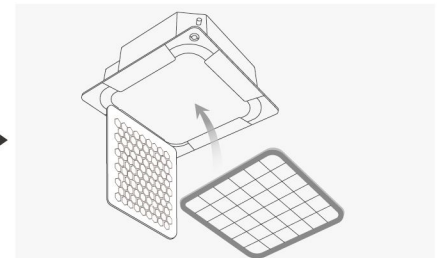

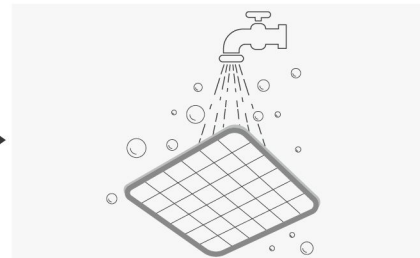

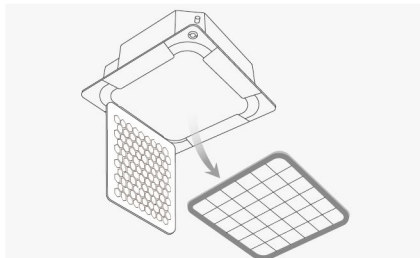

■ Pollutants activity is inhibited.

HI-NANO Sterilization Type			
92.6% of H1N1	88.54% of E. coli	74.01% of Staphylococcus aureus	60.07% of PM2.5
HI-NANO can remove more than 92.6% of H1N1 in 2 hours.	HI-NANO can sterilize more than 88.54% of E. coli in 2 hours.	HI-NANO can sterilize more than 74.01% of Staphylococcus aureus in 2 hours.	HI-NANO can effective remove more than 60.07% of PM2.5 in 2 hours.
			

* The test result comes from the test of Hisense split air conditioner (model:AST-12UW4RMRCF) by SGS in a 30m³ test chamber.

Filter Easy Cleaning

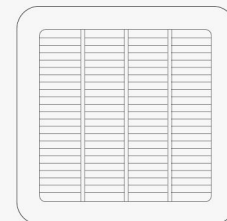

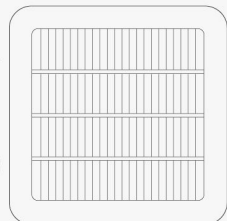

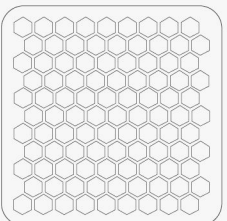

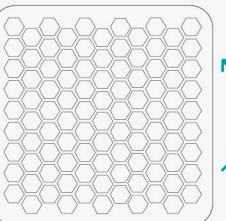

The filter is water-washable. After the cleaning of filter, the grille can be installed in any direction. The grille has no need to be adjusted in multiple units project thanks to special pattern design of hexagons and triangles.

■ Removing convenient

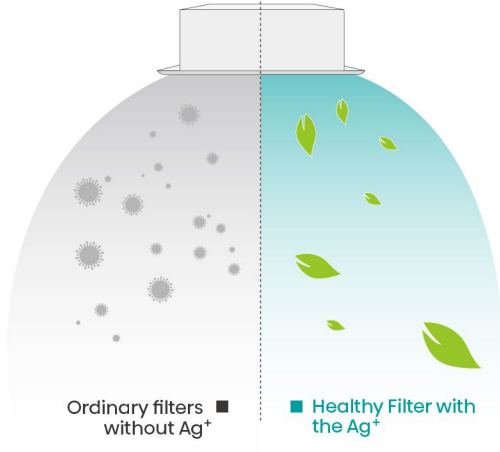

■ Washable high definition filter

■ Special pattern design grilles easy to install

 Conventional Grille	 Hisense Grille
 	 
■ Must be installed in a fixed direction.	■ Thanks to the special design, no need to adjust the installation direction.

Ag+ Healthy Filter

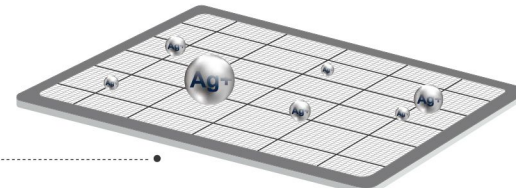

The Ag+ healthy filter is equipped as standard, which can effectively inhibit the breeding of bacteria and viruses, thereby ensuring a healthy room air supply.

Ordinary filters without Ag+

Healthy Filter with the Ag+

Effectively Restraining Bacteria		
Escherichia coli 99.99%	Anti-mould	Staphylococcus aureus 99.99%
		
* Sterilize bacteria effectively by destroying their inner configuration.		

Hidden Display

Different from traditional light display, temperature on the LED display panel is easily visible; the display is hidden in OFF mode, and the design is simple and neat.

■ LED ON

■ LED OFF

Error Code Display

We can identify the Error code through the panel display. When there is an error, E will light up and the error code will flash. It is easier for us to troubleshoot.

■ Example: Error code E22

22℃ or 22 fault can be distinguished.

High Sense Panel

The space dislocation design of triangular and hexagonal can achieve the wind-breaking low noise. And this high sense design can match any decoration style.

Compact Design

The compact design with body thickness of only 236mm reduces the ceiling height. The compact design makes slimmest design for high efficiency lineup in class.

Branch Discharge Option

In irregular room layouts, branch discharge could come in handy by extending air distribution area to the most awkward corners without additional indoor units.

Inner High Lift Pump

The maximum lift of Hisense high lift pump components can be as high as 1200mm.

* In order to ensure smooth drainage in long-term operation, the recommended drainage height is ≤800mm.

High Ceiling

When the ceiling is high, the unit parameters can be set by the wired controller to compensate the installation height. Even in spaces with high ceilings, a comfortable airflow is carried down to the floor level.

DUCT

Slim Design

Slim duct unit, from 2.5kW to 7.0kW, have the height of only 190mm.

HSP Up to 250Pa

The external static pressure of ESP Duct unit up to a maximum of 150Pa makes it applicable for a wide range of building types.

250 Pa

Easy Installation

Air suction direction can be altered from rear to bottom, giving a choice between free use and connection to optional suction grilles.

* The noise value of rear suction is 5dB lower than that of the bottom suction, so rear suction is recommended.

Float Switch

The float switch can ensure the water is always under the safety level, even if the pump failed or the drain is blocked. This is double insurance for no water leakage disaster. Hisense duct units are all standard with float switches. The drain pan of Hisense is big enough for containing all the water returned from the drain pipe in suddenly power off.

Inner High Lift Pump

The maximum lift of Hisense high lift pump components can be as high as 1200mm.

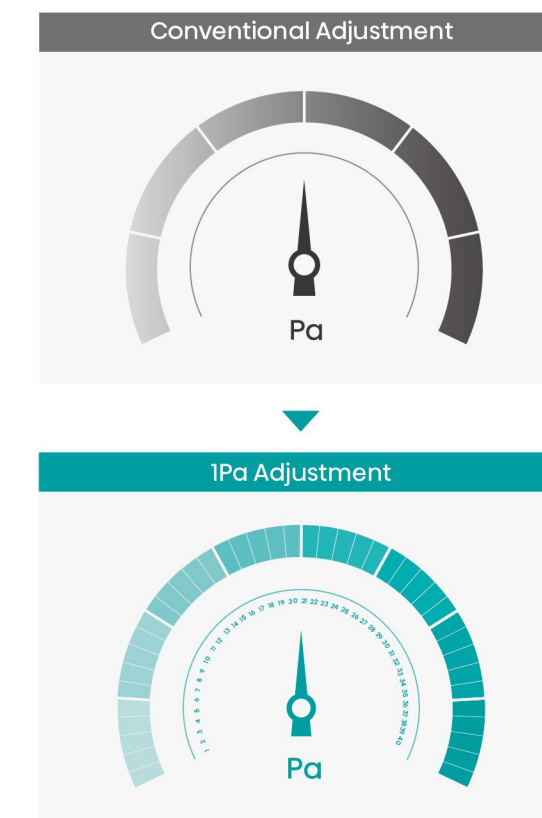

* In order to ensure smooth drainage in long-term operation, the recommended drainage height is ≤800mm.

1Pa Adjustment

It is possible to adjust the ESP setting via wired controller. And the precision of 1 Pa can give the most accurate ESP setting in class.

* YXE-C01U(E) is recommended to set the ESP parameter.(Parameter setting 17→10→from 1 to 250)
Warning: The slim duct with the capacity of 7.0kW(24K Btu/h) has the max ESP 40Pa. If we have to install the duct unit with a long duct, we have to choose the MSP duct of 7.0kW(24K Btu/h).

Filter

Hisense Duct units are all standard with nylon filter. The long-life filter can reduce the replacement and cleaning times. The filter is washable so that the dust can be easily washed off from the filter.

CEILING SUSPENDED

Flexible Installation

Ceiling suspended unit adopts a special structure which can meet seat, lifting and inclined installation mode. And piping can be arranged in four directions, left, right, rear and bottom.

- 4-direction refrigerant piping offers greater installation flexibility.

Sleek Smooth Design

Shiny white cover panel of the unit has a streamlined elegant aesthetic. The bolts and nuts used to secure the unit onto wall or ceiling are designed to be concealed in the unit for a sleek room interior look.

Easy Installation

Without the need to access the internal parts, just opening the side panels can adjust the ceiling or wall mounting height. Service manholes are unnecessary due to easy design of electric box.

4D Airflow

The horizontal and vertical airflow can provide better comfort. Up to 90° airflow in horizontal direction. Up to 130° airflow in vertical direction.

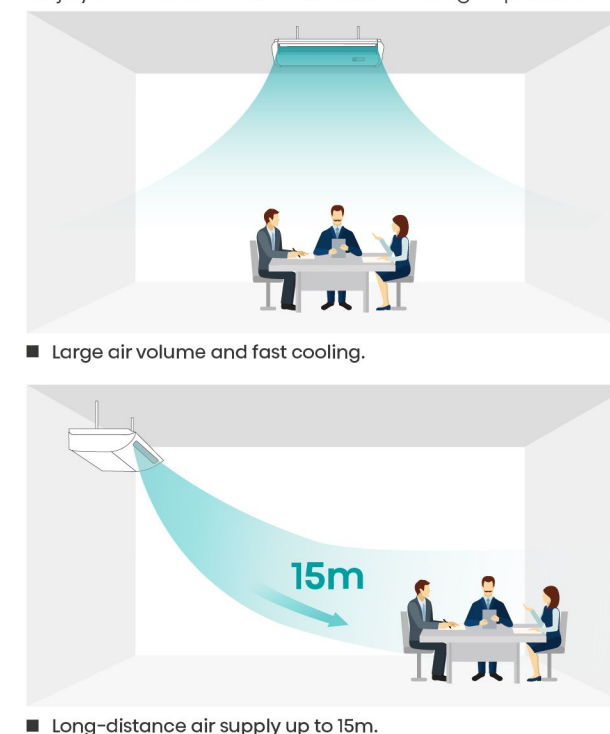

ON/OFF button

We can start the unit by pressing the emergency use bottom when the controller is not available. And it is very convenient for floor seated installation.

Airflow 15m distance

The airflow can be up to 15m distance. People can enjoy comfortable airflow even in large spaces.

Optional Healthy Filter

There are a variety of optional healthy filter. Acticarbon Filter 4, Silver Ion Filter, 4-in-1 Filter etc.

18m Long Distance Airflow

To meet the needs of large space, such as living room and meeting room.

■ Long-distance air supply up to 18m.

■ Large air volume and fast cooling.

4D Air Flow

The air louvers which can swing vertically and horizontally helps to circulate air to every corner of the room.

■ Right and left

■ Up and down

Easy Clean Filter

The filter can be removed and cleaned easily.

■ Removing convenient

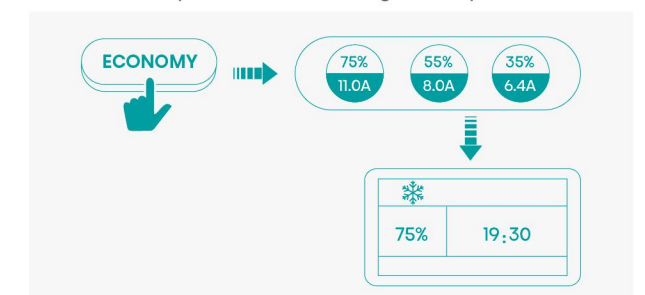

■ Washable high definition filter

Hi-Amp Control

Don't worry about electricity limit, it can bring you durable comfort and cooling all the time.

- When in Cooling mode, Press economy button for about 5 Seconds once to start Power control mode. (at low fan speed) Press the button about 5 seconds once again to stop it.
- When the appliance in the Power control mode, Press ECONOMY button once by once. Result: The operation modes changed in sequence.

OUTDOOR UNIT

Inner Stop Valve

The inner stop valve can realize 4 way piping connection(front, rear, right, down), it is more beautiful and easy installation.

Hi-Checker

Hi-Checker is a tool to record and monitor the operation of Hisense inverter air conditioners. It can help to provide a fast, efficient, and professional after-sale service.

Full DC

Hisense full DC is DC inverter compressor + DC outdoor fan motor + DC indoor fan motor + EEV. We can ensure the high efficiency not only in full load, but also in part load.

Faster Vacuum

The double 3-way stop valves, not matter built inside or outside, can help to vacuum fast.

Leakage Detective

The system will send an error code E96 and stop running when the refrigerant leakage value reaches a low value, so as to ensure safety operation of the R32 air conditioners.

Wide Ambient Temperature Range

Cooling: Up to -15°C ~ 48°C
Heating: Up to -10°C ~ 24°C

* Refer to the temperature range in specs for the specific model.

TWIN, TRIPLE AND QUADRUPLE SYSTEM

With the cooperation of simplified central control system, the LCAC unit can be combined into a simplified mini VRF system. We call them twin, triple and quadruple system.

* All indoor units will operate at exactly the same setting in this simplified mini VRF system.

CONTROL SYSTEM

Wired Controller & Central Controller

■ YXE-C01U1(E)

YXE-C01U1(E) is YXE-C01U Pro, with the optimize of the setting method of some special functions. For Example, cooling only setting, Boot setting etc.

■ YXE-E01U(E)

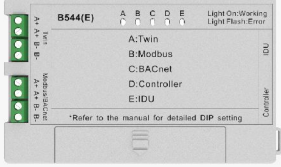

YXE-E01U(E) is brand new wired controller, replace YXE-A03 series, with the optimize of many functions. For Example, Independent control function of air louver can be realized.

■ YJE-C01T(E)

YJE-C01T(E) can control IDUs by B544(E).

■ B544(E)

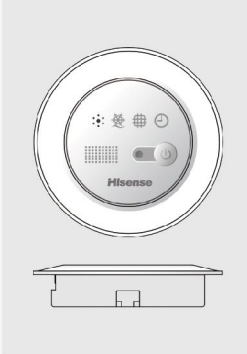

It is a communicating box used in central control system. One IDU uses one B544(E). Adapter of the combination of B544(E) & B542(E) & B543(E)
*B544(E) is the adapter of BACnet, Modbus, Twin System.

Communication Box

----- : U-art communication protocol. The maximal quantity of controller is 16 in one same system.
----- : RS 485 & BACnet protocol.
YJE-C01T(E): The maximal quantity of centralized controller is 2.

R-A01Z(E)
Remote receiver kit, can work together with wired controller.

HLZX-01A
LCAC AHU Kit

Pump P-16
External pump, used for AC without internal pump.

Pump P-12
Semi-external pump, used for AC without internal pump.

Tools

Hi-Checker 1.0
Kit Checker naming Service Window is small and easy to carry. It can help us diagnose and resolve common problems at low cost and quickly.

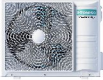

Hi-Checker 2.0
PC Checker can check the air conditioners professionally and comprehensively, and all parameters of the machine can be monitored in real time. Relevant data can be recorded, stored and reproduced.

Hi-Checker 3.0
APP Checker Combines the advantages of Kit Checker and PC Checker. We can check and troubleshoot the operation of the machine through the APP installed on the mobile phone. This solution is easy for users to carry, record and communicate with each other.

FREE MATCH

Freematch up to 5

One Freematch exterior unit can be matched with up to 5 different interior units, each of which can be individually controlled.

Note: Refer to the Freematch match table for more information.

Compact Design

Lighter and more compact units for easier and more flexible installation, as well as easier transportation with a higher potential volume of ACs per transportation unit.

Note: Hisense has the most compact 1 by 2 multi-split outdoor unit mode in class.

New Path Design

The reverse path design improves efficiency of the exchanger greatly. Super cooling paths improve the cooling capacity of each unit and lengthen the pipes between the exterior and interior units.

Big Family

We will have 10 models of the R32 Freematch on sale in the near future, providing customers with more choices than ever. The whole family of models is fully DC so they can be used in 50Hz or 60Hz countries and regions.

Combinations Table

	Outdoor Unit Capacity	Indoor Unit Combinations
