

### Hi-FLEXI, High Quality

High-efficiency performance, high-intelligence and reliability operation, high-flexibility of installation and maintenance and efficient after-sales service system.

Based on the platform of large capacity high pressure chamber scroll compressor and stepless inverter technology, Hisense VRF Hi-FLEXI C series aims at improving the comfort of space; every detail is fully considered in the process of design and installation; accordingly bring you completely new space experience.

- High efficiency high pressure chamber scroll compressor
- Leading inverter control technology
- The structure of front flow series is very compact
- Flexible combination of top flow, meet the demand for larger space
- Focusing on health, space comfort is greatly improved

### Choose Hi-Smart, Choose High Quality Life

Hi-Smart L Series, household central air conditioning system, is specially designed for medium and large high-end real estate. The outstanding appearance and function design, the application of leading technology and high quality components make it a perfect choice for users.

- High efficiency full DC inverter compressor and DC fan motor
- Double-mute intelligent operation control
- Intelligent control system
- Industrial leading-intelligence defrosting technology

### Hi-FLEXI, High Quality

High-efficiency performance, high-intelligence and reliability operation, high-flexibility of installation and maintenance and efficient after-sales service system.

The adoption of Hisense VRF Hi-FLEXI W series air conditioning system is free from conventional low-temperature climate and geographical constraints, it can be widely used in many water conditions and also be used in combined climate with other energy sources such as solar and other new energy.

- Water Source Application, Environment-friendly and Energy-saving
- Wide application range
- Small volume and light weight, save transport and installation space
- Intelligent control system

### Choose Hi-Smart, Choose High Quality Life

Hi-Smart E Series, household central air conditioning system, of which the compact outdoor units bring high flexibility of installation and maintenance, and with the light and slim indoor units creates an elegant and high taste domestic environment.

- With double-mute intelligent operation, the lowest noise is 21dB
- Circulating airflow, even air supply
- Industrial leading-intelligence defrosting technology
